Cash, Carol (1993). A Study of the Relationship Between School Building Condition and Student Achievement and Behavior. Unpublished doctoral dissertation. Blacksburg, VA: Virginia Polytechnic Institute and State University, pp. 1-124. In a sample of small rural Virginia high schools, test scores were found to be lower for students of low quality school buildings. Cosmetic factors seemed to have more of an effect on achievement than structural factors.

Chan, Tak Cheung. 1979. *The Impact of School Building Age on Public Achievement*. Unpublished doctoral dissertation (abstracted version appears in *The Educational Facility Planner*). Found significant relationship between school building age and achievement in 8th graders.

Chan, T.C. (1980). Physical environment and middle grade achievement. (ERIC Document Reproduction Service No. ED 198 645).

Christopher, Gaylaird. 1988. "Does the Quality of the School Environment Affect the Quality of Our Children's Education?" *The Educational Facility Planner* 26(4): 21-23. Discusses AIA study in preliminary stages, attempting to document impact of facilities on quality of education.
